ABOUT MYSELF

Full-Stack Developer with a strong focus on Python backend systems, DevOps automation, and scalable web applications. Experienced in designing clean database architectures, building reliable data pipelines, and deploying production systems using Docker and Linux servers. Comfortable working under pressure, collaborating with cross-functional teams, and delivering maintainable, high-performance solutions.

WORK EXPERIENCE

31/12/2022 - LONDON, UNITED KINGDOM

FULL STACK DEVELOPER ANNECTO COMPANY

- Developed and maintained full-stack web applications using Django, React, and Docker within a collaborative team environment.
- Contributed to version control, task organization, and release workflows using Git.
- Worked closely with team members to deliver features on time and maintain clear technical documentation.

31/01/2024 - KUWAIT

PYTHON & DEVOPS DEVELOPER BEINMEDIA

- Designed and operated scalable data scraping pipelines from virtual mobile environments (emulators/simulators) under variable network and UI conditions.
- Built, deployed, and maintained backend services on Ubuntu servers, including automation, monitoring, and incident troubleshooting.
- Developed clean, modular, and well-tested Python code with CI support for long-term maintainability.
- Automated operational workflows (deployments, backups, log rotation, health checks), significantly reducing manual intervention and deployment errors.
- Implemented monitoring and alerting systems and participated in on-call rotations and incident response.
- Designed and managed advanced automation workflows using n8n for content publishing across multiple social media platforms.
- Built AI-driven pipelines for generating and publishing professional video content, improving posting consistency and audience reach.
- Contributed to audience growth initiatives by automating content distribution and optimization workflows across social platforms.

30/09/2022 - CURRENT - MIDDLE EAST

FREELANCING MIDDLE EAST CLIENTS

- Delivered custom full-stack web applications using Django, React, and Docker for clients across the Middle East.
- Built and deployed multilingual (Arabic/English) systems with third-party integrations and cloud-based hosting.
- Developed solutions for e-commerce, FinTech, and internal enterprise platforms with a focus on performance, security, and reliability.
- Worked directly with clients to gather requirements, iterate on features, and deliver projects with clear communication and flexible execution.

EDUCATION & TRAINING

15/09/2019 - 11/09/2025 - DAMASCUS, SYRIA

COMPUTER AND AUTOMATION ENGINEERING - DAMASCUS UNIVERSITY

Address: Airport Road | **Website:** http://damascusuniversity.edu.sy/fmee/

31/05/2022 - 08/04/2023 - RIF DIMSHQ, SYRIA

WEB DEVELOPMENT - ENMAA CHARITY ASSOCIATION

Address: Muleha

SKILLS

Programming

Python | JavaScript | n8n | React | Django | Server Managment | Ansible | Git | ADB commands | Docker | web Scraping | Databases | LLMs | Linux & Linux Servers

PROGRAMMING PROJECTS

syria-location-database

Write here the contentSyria Administrative Data Processing A Python project that extracts and stores Syria's administrative divisions (Governorates, Cities, Districts, and Towns) from text files into MySQL and CSV. It prevents duplicates, supports Arabic-English translation, and includes an SQL view for easy queries.

04/04/2024 - CURRENT

List Manager

Developed a full-stack List Manager web application to optimize internal data management workflows. Designed a clean relational database with properly defined foreign keys to ensure data integrity and efficient relationships. Implemented secure file upload, tracking, and automated cleanup processes on the server. Built maintainable backend services using Django ORM for streamlined data operations. Deployed the application using Docker and automated server configuration and management with Ansible. Leveraged TOML-based configuration for flexible admin and system settings.

30/11/2023

Speech-to-Text AI Project

- Built an AI-based speech-to-text system with audio preprocessing for noise reduction and segmentation.
- Integrated speech recognition models to deliver accurate transcriptions.
- Deployed the system as a containerized service for reliable server-side usage.
