PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years building production web platforms, REST APIs, and automation systems in Python, JavaScript, and Go. Experienced with Django, Django REST Framework, FastAPI, React, and Next.js, with Docker-based deployment on Linux servers. Builds AI-powered products on top of large language model, speech-to-text, and video-analysis APIs, and large-scale web scraping pipelines. Comfortable owning a feature end to end, from database design through deployment, monitoring, and maintenance.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Go, SQL, Bash, Kotlin

Backend: Django, Django REST Framework, FastAPI, REST API design, Celery, Redis, asynchronous processing, webhooks, JWT and OAuth authentication

Frontend: React, Next.js, TypeScript, Tailwind CSS, HTML, CSS, responsive and bilingual (Arabic/English, RTL) interfaces

Databases: PostgreSQL, MySQL, MariaDB, SQLite, Redis, relational schema design, query optimization

DevOps & Cloud: Docker, Linux server administration, Ansible, CI workflows, Amazon S3, Git, deployment automation, monitoring

AI & Automation: n8n, OpenAI API, Google Gemini, Whisper speech-to-text, large language model integration, AI content pipelines

Data & Scraping: Playwright, yt-dlp, FFmpeg, EasyOCR, web scraping at scale, proxy rotation, ADB and virtual Android environments

PROFESSIONAL EXPERIENCE

Python & DevOps Developer - BeinMedia

Kuwait (remote) | Jan 2024 - Present

- Built and maintained scalable scraping pipelines running on virtual mobile environments under dynamic, anti-bot conditions.
- Developed and deployed backend services on Linux servers using Docker and CI workflows.
- Designed automation systems with n8n for AI-driven content generation and multi-platform social media publishing.
- Automated deployment, monitoring, and system maintenance, cutting manual workload and operational errors.

Freelance Software Engineer - Cellusys

London, United Kingdom (remote) | Dec 2022 - Present

- Delivered full-stack web applications with Django, React, and Docker for international clients.
- Built scalable backend systems, REST APIs, and automation tools tailored to business requirements.
- Worked directly with clients to gather requirements and ship production-ready solutions.

Freelance Full-Stack Developer - Middle East Clients

Remote | Sep 2022 - Present

- Delivered custom web and automation solutions for clients in e-commerce, FinTech, and internal enterprise platforms.
- Built multilingual (Arabic/English) systems with third-party integrations and cloud deployment.
- Focused on performance, reliability, and scalable architecture.

SELECTED PROJECTS

Marsad - Short-Video Intelligence Platform

Tech: FastAPI, Go, Next.js, TypeScript, Google Gemini, Whisper, OpenAI, SQLite

- Built a platform that follows public Instagram and TikTok accounts, ingests their clips, and produces Arabic analyses with summary, hook, timestamped verbatim script, on-screen text, and call to action.
- Wrote a Go fetcher service and a TikTok scraper CLI behind a FastAPI backend, with residential proxy support, response caching, engagement history, and a job queue that streams progress to the client.
- Delivered a bilingual (Arabic/English) Next.js interface with shared team state, URL-driven filters, and a grounded per-clip question-and-answer thread with streaming replies.

Keyboardy - Arabic Short-Video Curation Pipeline

Tech: Python, Playwright, yt-dlp, FFmpeg, EasyOCR, Amazon S3, n8n

- Built an end-to-end pipeline that discovers trending Arabic TikTok content per country, downloads clips, and cuts them into scene-level segments with per-scene keywords.
- Added transcription and summarization, on-screen text recognition, theme matching, watermarking, and AV1 and WhatsApp re-encoding, plus Tenor GIF pack harvesting.
- Published curated clips to Amazon S3 and a collector API, driven by n8n webhooks and scheduled daily trend runs.

Instagram Engagement Suite - Comment Automation SaaS

Tech: FastAPI, Next.js, TypeScript, Tailwind CSS, Instagram Graph API, SQLite

- Built a multi-account SaaS for Instagram Business profiles with Facebook OAuth login, webhook-driven comment ingestion, manual replies, and auto-reply with follow-up direct messages.
- Delivered a bilingual (Arabic/English) dashboard with engagement analytics charts, comment classification, pagination, and light and dark themes.
- Implemented subscription redeem codes, per-account n8n webhook configuration, and signed session cookies with expiry handling.

Live Wallpapers Automation - Pinterest Media Harvester

Tech: Go, concurrency, HTTP scraping

- Built a Go command-line tool that searches Pinterest, resolves the highest-resolution image behind each pin, and downloads results through a configurable worker pool.
- Added deduplication against previously saved pins, per-query output folders, and a links-only mode for downstream automation.

Haweess - Affiliate Commerce Platform

Tech: Django REST Framework, Next.js, TypeScript, Kotlin, Jetpack Compose, Docker

- Built a multi-role commerce platform connecting merchants, marketers, and customers through referral links and automated commission distribution.
- Delivered REST APIs, a responsive web frontend, and an Android client with product, order, wallet, review, and push-notification features.

Sayar - AI-Powered Arabic Pronunciation Platform

Tech: Django REST Framework, React, Whisper, Celery, Redis, MySQL, Docker

- Developed a bilingual learning platform that records, analyzes, and gives feedback on Arabic pronunciation.
- Implemented JWT authentication, asynchronous audio processing, learning progress tracking, and an interactive audio interface.

Medo Freight - International Freight Management Platform

Tech: Django, Next.js, PostgreSQL, Docker

- Built a freight-management system for creating shipments, calculating prices, and generating shipping labels and signature documents.
- Implemented workflows aligned with international shipping requirements for freight operations and documentation.

Link: <https://medo-freight.eu/>

AI Content Automation Pipeline - Social Media Automation System

Tech: n8n, Python, AI APIs, webhooks

- Designed end-to-end automation workflows for generating and publishing content across multiple social media platforms.
- Built AI-driven pipelines for automated text and video creation, formatting, and scheduled distribution.
- Integrated multi-platform publishing (Telegram and social networks) with no manual intervention, improving publishing consistency.

Operation and Maintenance Portal

Tech: Django, React, MySQL, Keycloak, Docker

- Developed an internal portal for searching, uploading, downloading, tagging, and auditing operational files.
- Added paused and aged-file handling, access controls, configuration management, and reporting workflows.

Employee Recognition and Rewards Platform

Tech: Django REST Framework, React, Google OAuth, MariaDB, Docker

- Built an employee nomination system with approval workflows, star balances, and administrative dashboards.
- Implemented Google authentication, verifiable PDF certificates, email notifications, and CSV reporting.

Full-Stack List Manager - Internal Data Management System

Tech: Django, React, PostgreSQL, Docker, Ansible

- Developed a full-stack web application to manage and track structured data workflows.
- Designed the relational database schema with optimized queries and data integrity constraints.
- Implemented secure file handling, tracking, and automated cleanup, deployed with Docker and Ansible.

SP Today API - Real-Time Data Scraping Service

Tech: Python, FastAPI, web scraping, n8n

- Built a backend service that collects and serves real-time currency and gold prices through structured API responses.
- Designed reliable scraping pipelines optimized for fast and continuous data delivery.

Chatbang Pro - Terminal Client for ChatGPT

Tech: Go, chromedp, Chromium automation

- Extended an open-source terminal client with DOM-based response extraction, Unicode and RTL support, browser detection, and custom GPT support.
- Improved reliability for long responses and browser disconnections, and published a Linux release workflow.

CV Mailer - Automated Job Application System

Tech: Python, SMTP, automation

- Built an automation tool that sends personalized job application emails with CV attachments at scale, with dynamic email generation, scheduling, and delivery tracking.

EDUCATION

Computer and Automation Engineering - Damascus University

Damascus, Syria | Sep 2019 - Sep 2025

Web Development Program - Enmaa Charity Association

Rif Dimashq, Syria | May 2022 - Apr 2023

LANGUAGES

Arabic - Native | English - Professional working proficiency
